

EIR texture board is a unique two-sided embossing process that embosses synchronized in register texture patterns to match the precise grain patterns and directions seen on the finish. This means wherever you can see the grain on the surface you can feel the grain!

These elegant EIR surface finishes were designed to mimic the unique grain patterns found on the rare white walnut and hickory wood species giving your furniture the true touch and feel of real wood. IOF is proud to say that all of our premium EIR finishes are available to all of our dealers at no additional upcharge!

TEXTURED

Symmetrical embossed texture pattern.

EIR

Synchronized texturing that matches the surfaces grain direction.

WHY BUY EIR?

- EIR finishes give your furniture the true, touch, feel, and appearance of real wood at a cost-effective price point.
- Unlike comparable competition who charge 15-25% more for EIR surface finishes IOF offers all of our EIR options for no additional upcharge.
- Unique surface options that are unavailable from imports and overseas companies.
- Sleek and stylish finishes for the modern office space.
